

Lesson 1.8 Objective: SWBAT determine and describe transformations of functions.

Kickoff

Identify the transformations that map

$$f(x) \rightarrow g(x)$$

$$f(x) = x^2$$

$$g(x) = -(x-2)^2 + 4$$

right 2
up 4
reflection over x-axis

Sep 26-6:23 AM

Homework

Sep 26-6:26 AM

Non Rigid Transformations- *Change Shape Or Size of the function*

Vertical Stretch- *closer to the y-axis*
 $a f(x)$ $a > 1$

Vertical Shrink- *farther from y-axis*
 fraction $0 < a < 1$
 "compressed"

Sep 26-6:26 AM

Putting them all together....

Function Notation $a f(x \pm h) \pm k$

reflection over y-axis \rightarrow a $f(x \pm h) \pm k$ \leftarrow reflection over y-axis

Stretch/Shrink \uparrow a

reflection over y-axis \downarrow $f(x \pm h)$

horizontal Shift \uparrow h \downarrow *Opposite

Vertical Shift \uparrow k

Sep 26-6:36 AM

***ORDER TO FOLLOW TRANSFORMATIONS**

- horizontal shift
- * Shrink/Stretch
- * reflection
- vertical shift

(Think PEMDAS)

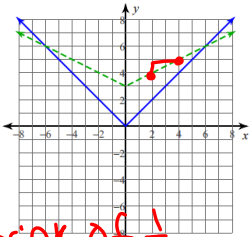

Sep 26-6:33 AM

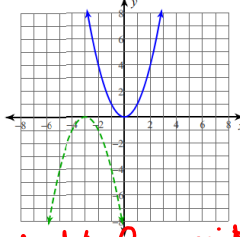

Describe the following transformations that map $f(x) \rightarrow g(x)$

- $f(x) = \sqrt{x}$
 $g(x) = -\sqrt{x-1}$
 - Stretch of 3
 - reflected over x-axis
 - down 1
- $f(x) = x^3$
 $g(x) = 3(x+1)^3$
 - left 1
 - Stretch 3

Sep 26-6:34 AM

Describe the transformations from the solid line to the dashed line.

3) 

4) 

*Shrink of 1/2
UP 3 units*

*left 3 units
reflect over x-axis*

Sep 26-6:42 AM

Write the equation for the following transformations.

5) Rational Function
Left 4 units
Reflection over y-axis
Up 5 units

6) Quadratic Equation
Right 2 units
Shrink of 1/2
Reflection over x-axis
Down 2 units

$f(x) = \frac{1}{-x+4} + 5$ $f(x) = -\frac{1}{2}(x-2)^2 - 2$

Sep 26-6:45 AM

Worksheet
1-3, 7-8, 11-12, 15

Sep 26-6:51 AM

Describe in words each transformation in the correct order.

1) $f(x-1)+5$ 2) $2g(x-1)$ 3) $-3g(x)-7$

Sep 26-6:49 AM

Write each description using function notation.

7) A reflection over the x axis and a shift left 2 _____

8) A vertical shift of 1/2 and a shift up 7 _____

Sep 26-6:51 AM

Write each description using the function given.

11) A quadratic function with a vertical stretch of 4, a shift up 2 and right 7 _____

12) A cubic function that has a horizontal shift right 3 and then reflects over the x-axis and then shifts down 4 units. _____

Sep 26-6:51 AM

15) Using the graph of $h(x)$ pictured below,

Sketch the following transformations. (If it helps, draw the original function)

$h(x - 1) + 3$ $-h(x + 2) - 3$ $-h(x - 3) + 2$

Sep 26-6:51 AM
